GRUPO LUCCI
GROWING RESPONSIBLY

Our Commitments

Through our companies, at Grupo Lucci we produce and industrialize agricultural raw materials meant for food production. We constantly seek to add value to everything we do, based on competitiveness, sustainability and innovation.

We contribute in a sustainable way to improving people's quality of life in the world, by offering quality- certified, natural and healthy food in a responsible manner, thus ensuring the continuity of our operations.

Through our business model, we generate value for the stakeholders, integrating social, economic and environmental performance.

Sustainability is at the centre of our business decisions, and we take on commitments to preserve natural resources for future generations.

Our Commitments to Sustainable Development

Food Safety in our Products

We produce healthy and safe products which meet international quality and safety standards, balancing short-term and long-term interests while we integrate economic, environmental and social aspects for decision making.

Rational Use of Water

Water is an essential natural resource for life in our planet, as well as a crucial resource for food production. Thus, we commit to managing it efficiently and responsibly.

Energy Efficiency

Energy efficiency is essential to make our products more sustainable and reduce the emissions of CO2 and other harmful gases in the atmosphere. Therefore, an efficient use of energy will enable us to develop our activities in keeping with a global trend towards low-carbon manufacturing and cleaner energy sources.

Circular Economy

By means of circular economy practices, we reduce the use of resources in production, maximize their use and ensure their final disposal, prioritizing the recovery and reuse of materials. We generate renewable electric energy from our effluents, manage our waste and process plastics at our Plastic Waste Recycling Plant in order to obtain other products that can be sold or incorporated into new production systems.

Biodiversity Conservation

Biodiversity is the diversity of life, that is to say, the variety of living beings we can find in our planet and the relations established between each other and with their environment. Therefore, our aim is to integrate biodiversity conservation and its habitat with agricultural production in territories of high environmental value.

Protection of and Respect for Human Rights

We promote and respect universally accepted human rights. We comply with applicable laws, guaranteeing decent work conditions, professional development, knowledge development and equal opportunities, involving our value chain in this commitment.

Responsibility and Transparency

We foster a culturally respectful work environment that promotes equality, is sensitive to the needs of every collaborator and respects diversity. Our commitment consists in establishing healthy relationships among collaborators but also business relations with our suppliers, customers, consultants, competitors and the general public. Every time one of them chooses us, they are choosing our attributes and they are relying on our products and the way we conduct our business.

Private Social Investment

Since 2003, through Fundación Vicente Lucci, we have channeled our social capital actions, based on three strategic pillars that have an impact on Grupo Lucci's rural communities of influence.

- ✓ Education
- ✓ Labour inclusion and entrepreneurship
- ✓ Citizen participation

Priorities in our Sustainable Performance

We work with different initiatives which prove this commitment.

Citrusvil's Model of Operational Excellence

Integrated Management System

Research, Development and Innovation

Sustainable Supply Program

Promotion of the development of regional economies in northwestern Argentina

Business integrity and transparency

Circular economy

· Integrated Production System | Zero Effluent.

· Waste management | Recycling

Water management and efficiency

Climate change mitigation

· Comprehensive management of GHG and energy efficiency

· Biodiversity conservation

Social investment
· Education
· Labour inclusion and entrepreneurship
· Citizen participation

Zero tolerance to child labour

Open Doors Program

Respect for labour and human rights

Development of talents and training courses for our human capital
